Budi mudar! Ne moraš učiti tablicu cijelu da bi iz matematike imao pet. Primjeti da se umnošci u gornjem i donjem dijelu ponavljaju. To znači da možeš naučiti samo gornji dio, a donji dio već ćeš znati ili obrnuto. Oboji stupce različitim bojama po svom izboru, kao u primjerima za brojeve 5, 7 i 9, i tako si olakšaj učenje.
